Subject: Dimock - Sampling Plan (Round 2)

Rich,

Please find the revised SAP for the Round 2 Sampling at the Dimock Residential Groundwater Site. It has been updated to remove the Hg method, and has been updated to reflect today's date. Round 1 Supplemental is finished, but I am awaiting verification of language within the data validation section before I submit it to you.

We will have the analytical requests ready for submittal by tomorrow morning.

I am still working on staffing and will keep you posted. To ensure we can procure the sampling equipment and supplies in time (YSI Water Quality, peristaltic pump, GPS, sample bottles, etc.) we will need to know whether we can start procuring these items by noon tomorrow (5/17/12) at the latest.

Thanks,

Suddha Graves
